🚀 PERSONAL PROJECTS

Booking System Web Project (06/2023 - 08/2023)

- The application represents a booking system where users can book rooms in hotels or rent a car. Every user can write reviews about particular hotel and the owner of the review can edit it. Users can filter hotels by given hotel benefits, star rating, country or city. The application is fully responsive and has fully responsive admin pannel
- **Technologies: C#, ASP.NET Core (MVC Pattern), Entity Framework Core, (code first approach) MS SQL Server, JavaScript, HTML, CSS, NUnit, Moq, GIT.** This project was rated excellent by SoftUni examiner
- Link to the project - <https://github.com/RosenYordanov2003/BookingWebProject>

PERSONAL PROJECTS

Ecommerce App (11/2023 - Present)

- The application represents ecommerce shop where users can buy clothes or shoes, can write reviews about them and can edit their own reviews. Users can filter products by brand or category and search for particular product. When user reaches particular orders count, promotion code is sent to him by email. The application is fully responsive. and also has fully responsive admin panel.
- **Technologies which I have used: C#, ASP.NET Core (Web Api), ReactJS, MS SQL Server, Smtip client, SignalR, Entity Framework Core, CSS, Git.**
- Link to the project - <https://github.com/RosenYordanov2003/EcommerceApp>.

CERTIFICATES

All certificates 2022 - up to now [↗](#)

This is a link to all my certificates from SoftUni C# Path. Each certificate has an excellent grade of 6.00
